"Experience is Our Most Powerful Tool"

## UNDER CONSTRUCTION

Alice Hyde Malone, VT

*Completed*

Barre Street Box Culvert Montpelier, VT

CCS is paving here this week and will be installing guardrails and perform site clean-up next week.

Bristol STP F 021-1(15) Bristol, VT

CCS's Link-Belt 298 and Grove 5275 will be working together to erect new bridge steel for J.A. McDonald.

Middlebury Athletic Facility Middlebury, VT

While CCS is primarily complete at this project, we will return next week to perform site clean-up.

Reinhart Food Service Essex, VT

CCS will be returning here to build pallet racks and finish the misc. steel this month.

Rochester BRF 0182(16-19) Rochester, VT

CCS will install a temporary bridge at this site before removing the current temporary bridge that was constructed after Hurricane Irene. We will return in the fall to set new bridge steel and remove the temporary structure.

Smugglers Notch Jeffersonville, VT

CCS will be driving piles in the Lamoille River for a new water intake structure.

TJX Office Framingham, MA

CCS is constructing a 97,000 sq. ft. building and a bridge over an existing parking garage to connect the new structure to existing office space at this headquarters for TJ Max. This is CCS's first job with Beauce Atlas.

Bar-B-Q Grill Morrisville, VT

In recognition of nearly one year accident-free, CCS will have a drawing for a Bar-B-Q grill at the end of the month. The grill is on display in the office. Congratulations to everyone who works to keep CCS a safe place to work.

Employees Are Our Most Valuable Asset.

## On The Horizon

Waterbury State Office Complex Waterbury, VT

This 85,000 sq. ft. project where CCS will be setting 521 tons of structural steel as well as doing the misc. steel package for PC Construction has a June start.

Champlain College Center for Communications

This 49,000 sq. ft. project for HP Cummings entailing 276 tons of steel will begin July 14th and take part in two phases. The first phase is erecting levels of steel and precast wall panels. Second phase involves returning in the fall to complete.

Stowe Adventure Center Stowe, VT

A September start is anticipated at this project where two buildings and a 94,000 sq. ft. underground parking garage will be constructed. The project involves setting 1500 tons of steel and 180 precast wall panels. In November CCS will move a second crane and a second crew onto this job site.

Appalachian Trail Bridge Rutland County, VT

CCS will be pouring new abutments and setting five 65' precast box beams weighing about 60,000 lbs on this famous hiking trail.

Deer Valley Transit Authority Wilmington, VT

A July start is anticipated at this 15,000 sq. ft. transit facility.

Dartmouth College Hanover, NH

CCS will be erecting bleachers at the football stadium at Dartmouth College in March 2015.

Green Mnt. Coffee Roasters Essex, VT

In June CCS will be replacing existing steel here which will support two new thermal oxidizer units.

Gorge Dam S. Burlington, VT

CCS's Link-Belt 298 will provide crane support to this dam rehabilitation project for PC Construction.
