UNDER CONSTRUCTION

DD1 Refueling Complex

Our equipment and facilities are not our most valuable assets — you are. There is nothing we make that is more important than everyone arriving home safely at the end of a project. Let’s recommit to protecting each other by being active safety leaders in 2019.

A January 14th start is planned at this 800 ton, 6-building project where submarines will be decommissioned.

Weybridge-New Haven Bridge BF032-1(19)

CCS opened this bridge early; on day 53 of a 60 day shutdown.

Complete

Wentworth Douglas Hospital Portsmouth, NH

CCS has erected all of the steel and finished setting the last of the precast. Currently, we are working on the canopy of the second building and plan to be complete by month’s end.

IDEXX Lab Synergy East

Westbrook, ME

CCS is setting 900 tons of steel for PC Construction at this 136,000 sq. ft. laboratory building.

East Montpelier

BRF037-1(7)

VT

CCS opened this 182 foot bridge on schedule. We will return in the spring to finish site work, final paving, sidewalk, curbing, topsoil, and seed.
